Project Abstract: The Beaverhead Conservation District Big Hole Spring Creek and Water Quality Enhancement Project proposes to rehabilitate three spring creek sources and direct them into one new channel. The new channel, which follows a historic channel, will flow into the Big Hole River at year-round at temperatures between 45 and 52 degrees Fahrenheit. Project ID: 5706000029 **Project Name:** E. Bench ID Canal Lining **Project Category:** Water and Environment **Sub Class:** 540W6

Project Abstract: The East Bench Irrigation District (EBID) is located near Dillon, MT in Beaverhead County and serves about 22,960 acres and 155 farms or ranches on a 53-mile-long canal. EBID identified approximately 4,320 feet of the main canal as having significant seepage problems, but only the most critical 2,000 feet were selected for lining by this project. The lining of the canal will significantly reduce seepage, improve the canal bank stability, and save about 3,600 acre-feet of water annually. The water savings will be used to increase crop production and reduce damage to adjacent property.

Project Abstract: The American Recovery and Reinvestment Act (ARRA) included $3 B nationally for Title I School Improvement grants to states in Fall 2009. MT selected 4 school districts, giving priority to districts with the lowest-achieving schools that showed the greatest need for funds and the strongest commitment to enabling their schools to meet the goals under school and district improvement, corrective action and restructuring plans. The Office of Public Instruction is administering project activities directly on behalf of the subrecipients, rather than providing subgrants.

Project ID: 690100000000008 **Project Name:** Weatherization **Project Category:** Energy and Weatherization **Sub Class:** 855WW

Project Abstract: These funds will provide grants for local HRDC's. The Weatherization Program's mission is to increase the energy efficiency of homes occupied by low-income individuals, thereby reducing their energy costs. The program has reduced the annual heating costs of recipient households by an average of approximately 32%. It serves approx 2,000 high energy burden households each year. ARRA funding will allow the Weatherization Program to serve at least 2,500 more families & to double the average labor & materials expenditure per dwelling for cost-effective energy conservation measures.

Project ID: 5706000039 **Project Name:** Lewistown WW System **Project Category:** Water and Environment **Sub Class:** 540W6

Project Abstract: Lewistown's wastewater facility serves 6,100 Montanans and 2,785 households. Hydraulically, the wastewater treatment plant receives an average additional flow of 730,000 gallons per day due to infiltrating groundwater. This flow decreases the growth capacity of the existing treatment system and inhibits the city's ability to meet anticipated future phosphorus levels. Lewistown proposed to rehabilitate or replace sewer mains to reduce inflow to the system. Thirteen blocks of particularly critical old sewer mains are proposed for replacement under this project.

Project Abstract: Winifred has a conventional gravity sewer collection system, mostly vitrified clay pipe. TV inspection of a portion of the collection system determined that it has considerable infiltration and inflow problems, most likely due to the age and condition of the facility and sump pumps. Excessive infiltration and inflow into the collection system and outfall piping create hydraulic overloading of the treatment facility. The project goals are to replace or rehabilitate sewer lines and eliminate groundwater pollution in town and reduce surface water degradation associated with the lagoon.

Project ID: 5706000054 **Project Name:** Whitefish WW System **Project Category:** Water and Environment **Sub Class:** 540W6

Project Abstract: The Whitefish sanitary sewer system experiences an estimated 78 million gallons per year of clear water infiltration through leaking sewer pipes and appurtenances. These flows contribute to overflows of raw sewage to the Whitefish River and also reduce treatment system efficiency. Whitefish will replace or rehabilitate about 10,325 lineal feet of sanitary sewer mains, rehabilitate up to 44 manholes, and construct a UV disinfection facility. This will reduce energy consumption by an estimated 3,500 kWh per year.

Project Abstract: Research at MSU to test the hypothesis that the prion agent can be shed from olfactory neurons into nasal secretions and the amount of prion infectivity released will be enhanced under conditions that promote disruption of the of the olfactory epithelium. These studies can determine the role of olfactory neurons in prion shedding into nasal secretions and determine whether the ability of a common insult to the nasal epithelium to promote prion agent shedding could represent a novel mechanism to enhance prion transmission.

SNAP benefits provide eligible households an opportunity to obtain a more nutritious diet by supplementing their food budget. Additional benefits start at $24 and increase depending upon the number of individuals in the household. There is also a rule change for individuals in the Able-bodied Adults Without Children category that removes the time limited benefit policy. The additional administrative funding is considered one-time-only.
